

INICIO
WINDOWS + DOORS

ALUMINUM SERIES

INICIO. It's all you'll see.

OUR WINDOWS + DOORS COMMAND ATTENTION.

Builders, architects, designers, and dealers appreciate the profound effect windows have on a home's aesthetic appeal, but they are often overlooked by clients distracted by choosing colors and finishes. With the arrival of INICIO Windows' awe-inspiring designs, the focus shifts like the morning light—from such details to imbuing a home with the qualities that make it truly luxurious.

It is immediately evident INICIO Windows are designed and built like no other. Sashes glide. Latch operation is satisfying to the touch. Every aspect of design has been examined to produce windows and doors of uncompromising precision, unrivaled performance, and exacting construction backed by a support network that is second to none.

And the end result shifts envious, in-the-know gazes towards luxury that above all must be experienced.

**YOU'LL NEVER LOOK
AT WINDOWS THE
SAME WAY AGAIN.**

Lucky you.

**THE LUXURIOUS
WHOLE IS MORE
THAN THE SUM
OF ITS PARTS,
*but the parts
are nonetheless
impressive.***

European craftsmanship

Our artisans in Europe combine old-world skills with state-of-the-art materials to create windows and doors of enduring beauty and peerless function. Every detail has been refined, and the result is as exquisite to operate as it is to view.

Thermally broken profiles

Thermal breaks in the window frame enhance energy efficiency by influencing how heat is regulated and transferred throughout the window. Typically, energy efficiency is thought to be dependent on the glass, but INICIO Windows also use thermal breaks to further enhance performance by keeping heat from entering in summer and escaping in winter.

Reduced carbon footprint

INICIO Windows + Doors are committed to sustainability. Not only do we engineer and build every model to maximize thermal efficiency, we craft our windows and doors with aluminum that contains 65% recycled content as certified by European regulatory agencies.

A PORTFOLIO OF STYLES VYING FOR YOUR ATTENTION.

From the moment inspiration strikes to installation and beyond, all you'll see is perfection. Every INICIO window and door is meticulously engineered in Europe to surpass the most demanding American building standards. They are nothing less than the inspiring new standard in ultra-premium windows.

OUR WINDOW + DOOR OFFERINGS COMPLIMENT YOUR VISION:

- Fixed Direct Glaze Windows
- Casement (Crank-Out) Windows
- Casement (Push-Out) Windows
- Tilt Turn Windows
- Multi-Slide Doors
- Lift + Slide Doors
- Inswing Doors
- Outswing Doors
- Sliding Doors

WE ALSO OFFER

- Pivot Doors
- Bi-Fold Doors
- French Doors
- Arch Top Doors
- Round Top Doors
- Special Shapes

Our direct-glazed aluminum windows are customized to your vision and specifications. The only limitation is your imagination.

FEATURES AND DETAILS

- Large glass expanses for panoramic views
- Wide variety of configurations and sizes to fit your design requirements
- Edge of frame to glass is 2-11/32"

- 1 Top edge of frame to glass = 2.3"
- 2 Bottom sill to glass = 2.3"
- 3 Edge of jamb to glass = 2.3"

LUXURIOUS COLORS AND TEXTURES

FINISH & COLOR OPTIONS

At INICIO Windows + Doors, we provide premium finishes that seamlessly blend durability, style, and versatility for our aluminum windows and doors. Whether you're looking for timeless elegance or bold customization, our expanded range of finishes and colors ensures there's an option to suit every design vision.

Our standard finishes are available in 20 color options designed to deliver aesthetic appeal and long-lasting performance. These standard colors were chosen for their broad appeal, offering flexibility to suit many design preferences.

ANODIZED FINISH:

Choose from black and clear anodized finishes, now part of our standard offering. These finishes provide a sleek, modern look while maintaining exceptional durability.

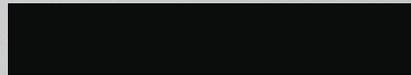

ENHANCED POWDER COAT FINISH:

All our windows and doors feature an AAMA 2604 powder coat with a seaside undercoat. This advanced finish ensures a long lasting, beautiful finish with superior durability and corrosion resistance.

CAN ENHANCE
YOUR VISION.**

GLASS OPTIONS

INICIO Windows + Doors provides a range of insulating solutions, including standard dual-pane or optional triple-pane glass, along with advanced surface coatings designed to regulate light and heat flow, enhancing a home's comfort and energy efficiency.

Low E2: A versatile and widely-used Low E coating, Low E2 is designed to perform effectively across various climates and regions. With its dual transparent silver layers, it strikes a balance between reducing solar heat gain and enhancing radiant heating efficiency.

Low E3: Ideal for areas where managing solar heat gain and U-value is essential, Low E3 features triple transparent silver layers that deliver radiant performance similar to Low E2. This coating is particularly suited for sunny, southern climates where keeping interiors cool takes priority over retaining heat.

Advanced Performance Glass: Building on the proven performance of Low E3, our Advanced Performance Glass adds an additional layer of protection, creating our highest-efficiency option for demanding climates and strict energy codes.

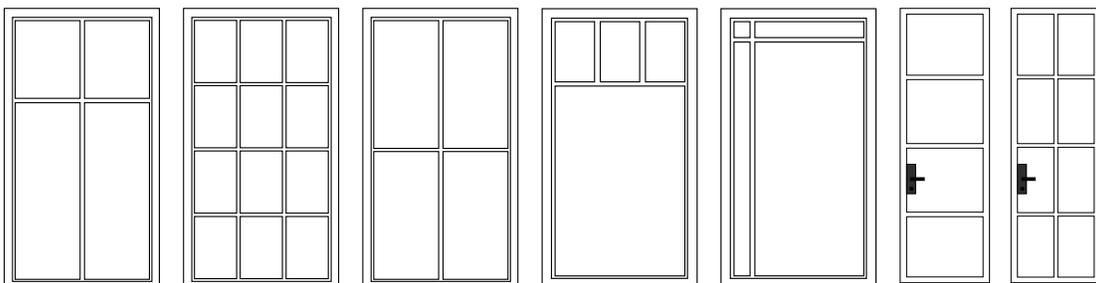

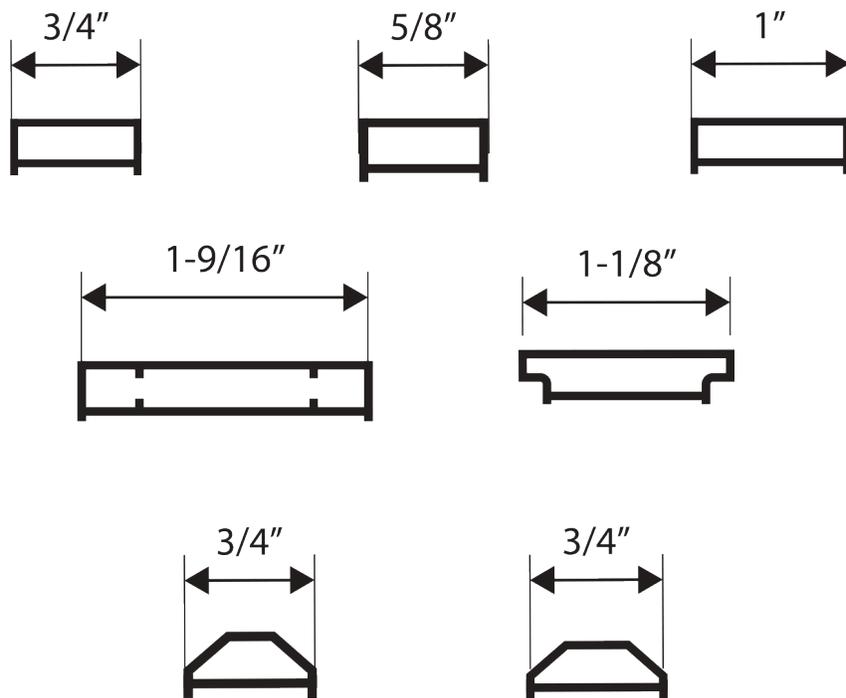

DIVIDED LITES. UNDIVIDED ATTENTION.

Simulated Divided Lite

INICIO Aluminum Windows feature precision-applied simulated divided lites with seven distinct profile options and virtually unlimited custom patterning. Clean, linear profiles support contemporary and modern designs, while select configurations allow designers to emulate the refined proportions of steel windows. Each configuration is engineered for precision, durability, and a crisp architectural aesthetic.

The result is enduring elegance paired with exceptional thermal performance, delivering windows that are as efficient as they are beautiful today and for years to come.

OUR PRECISION EVEN EXTENDS TO YOUR ENGINEERING AND CONSTRUCTION DRAWINGS.

INICIO Windows + Doors is a BMD company, a building solutions manufacturer that has supplied the finest quality products for nearly 80 years. This heritage assures you always receive the total luxury window experience that includes complimentary, high-quality architectural expertise and drawings exclusively for our dealers, ensuring precision and excellence without any additional cost.

Our portfolio of benefits also includes:

- Generous 10-10-5 Warranty
- Architectural Drafting and Support
- Design Support

All backed by the BMD team and its industry-leading experience.
