

# REDEFINE MOVEMENT, REDEFINE THE VIEW

Meticulously engineered in Europe for the most demanding American standards, the INICIO™ multi-slide door redefines smooth, seamless transitions between your spaces.

## WHERE NATURE MEETS DESIGN

With INICIO multi-slide doors, the boundary between interior and exterior fades away. Create a seamless connection to the outdoors, bathing your spaces in natural light and bringing fresh air and breathtaking landscapes into the heart of your home. Discover how seamlessly your world expands when INICIO opens the door.

## EFFORTLESS OPERATION

Designed with an advanced European carriage system, our multi-slide door moves with a nearly silent grace.

A simple touch glides each panel into place, making every transition instinctively smooth—so the view, it's all you'll see.

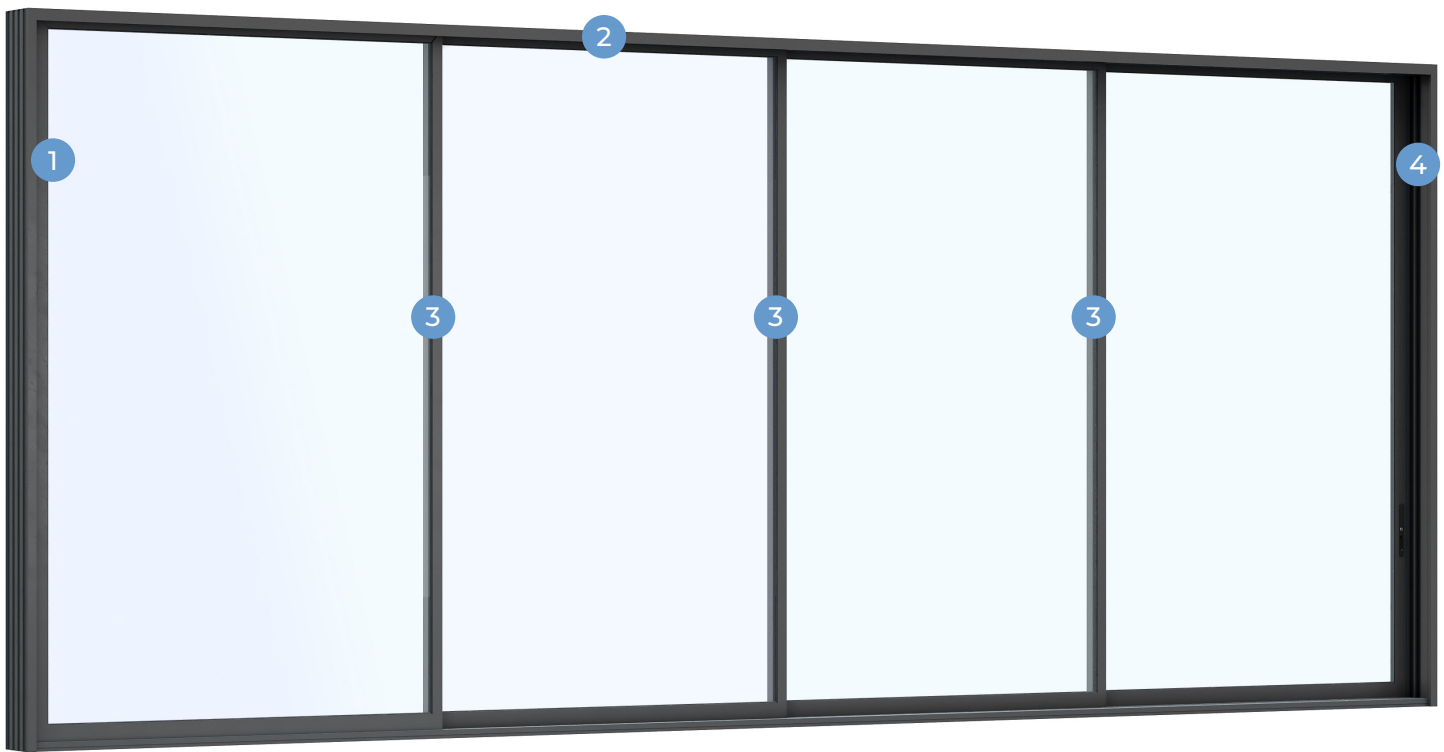

# MINIMALIST DESIGN, MAXIMUM IMPACT

Our doors feature narrow stiles and rails for a contemporary, minimalist profile—creating a balanced aesthetic that lets the glass, and thus the view, become the star.

Crafted from high-grade aluminum, INICIO doors provide enduring strength with minimal maintenance.

Engineered for perfection, designed for the most breathtaking views.

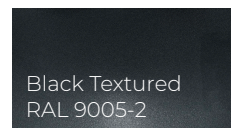

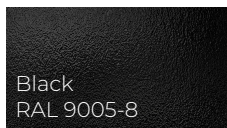

- 1 Side without lock = 2.75"\*    2 Top Edge of Frame = 3"    3 Interlock Width = 2.25"    4 Side with lock = 4"

\*Also available in a 4" symmetrical look

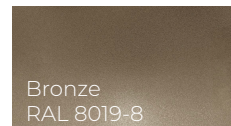

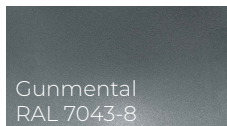

## FINISH THAT ENDURES

INICIO's proprietary three-step finish process ensures our aluminum finishes withstand the elements while maintaining their stunning appearance, all while being rigorously tested to meet AAMA 2605 standards.

### Standard Colors

### Optional Colors

We offer further customization options with any available color in the RAL specification system.

# PERFORMANCE FEATURES & DETAILED SPECIFICATIONS
